

Planning Worksheet #4

Identify Working Groups

NATIONAL DROUGHT
MITIGATION CENTER
UNIVERSITY OF NEBRASKA

Use this worksheet to identify sub-groups who will work together to accomplish the tasks and create the products needed to design, deliver, and assess the impact of the exercise.

For each working group below, identify specific names and contact information for potential members and invite them to participate. The number of individuals needed for each working group depends on the scope and complexity of your exercise. For a small-scale exercise, some groups, such as logistics, may consist of a single person.
